Moving to 'The Cloud' means doing away with expensive to maintain servers and local computer based software, in favour of running directly and securely from the internet. Cloud computing allows small business fast, flexible access and data management and use of powerful applications like Exchange, Sharepoint, Live Meeting and Office, as well as ERP systems like Greentree.

Because Cymax takes a business approach to IT and understands from a technology perspective what's required to support your business, you have the piece of mind knowing the right pieces have already been put together so you can focus your time where it is needed.

**Tailored for Greentree - Welcome to the Phoenix Cloud.**

Ph: 1300 790 690

**Talk to us about the Phoenix Cloud.**

**Ph: 1300 790 690**

With your business operating securely in the Phoenix Cloud - Cymax will provide a highly reliable and scalable platform. This will immediately deliver organisational efficiency and cost savings.

By taking a leap into the future your business will be more agile, easily responding to the dynamics of 'doing business'.

What makes the Phoenix Cloud unique is not just that the suite of applications pieced together for your business, it is that we can also optionally manage and maintain connectivity of your business from the cloud all the way to the keyboard in your office (and everything in between). Well, What are you waiting for?
