

# Proctortrack delivers Identity Authentication and Automated Proctoring

Fully integrated with:

**Proctortrack\* is Proctorless™** and is the only automated remote proctoring solution that continuously verifies the identity of online test takers while also detecting and deterring cheating.

Proctortrack's patented full feature set makes it the best-in-class choice for remote proctoring.

As academic institutions migrate more of their programs into various online learning management systems, the need for online proctoring solutions has become ever more apparent.

Often times, it's the instructors that end up overwhelmed coordinating student schedule changes. Institutions are now seeking a proctoring solution that can scale and be flexible to students' growing need to take exams any time of the day and at the place of their choosing, all while proctoring without human error.

Verificient Technologies' flagship solution, Proctortrack, is the only automated software that offers continuous identity verification of online test-takers, **anytime and anywhere**. Through facial recognition software, the application automates proctoring by monitoring for test policy compliance. It can detect when a student leaves a test, is replaced during a test, receives assistance from a friend or searches online for answers. Proctortrack detects various levels of deceit or misconduct defined by the institution and the framework of the test.

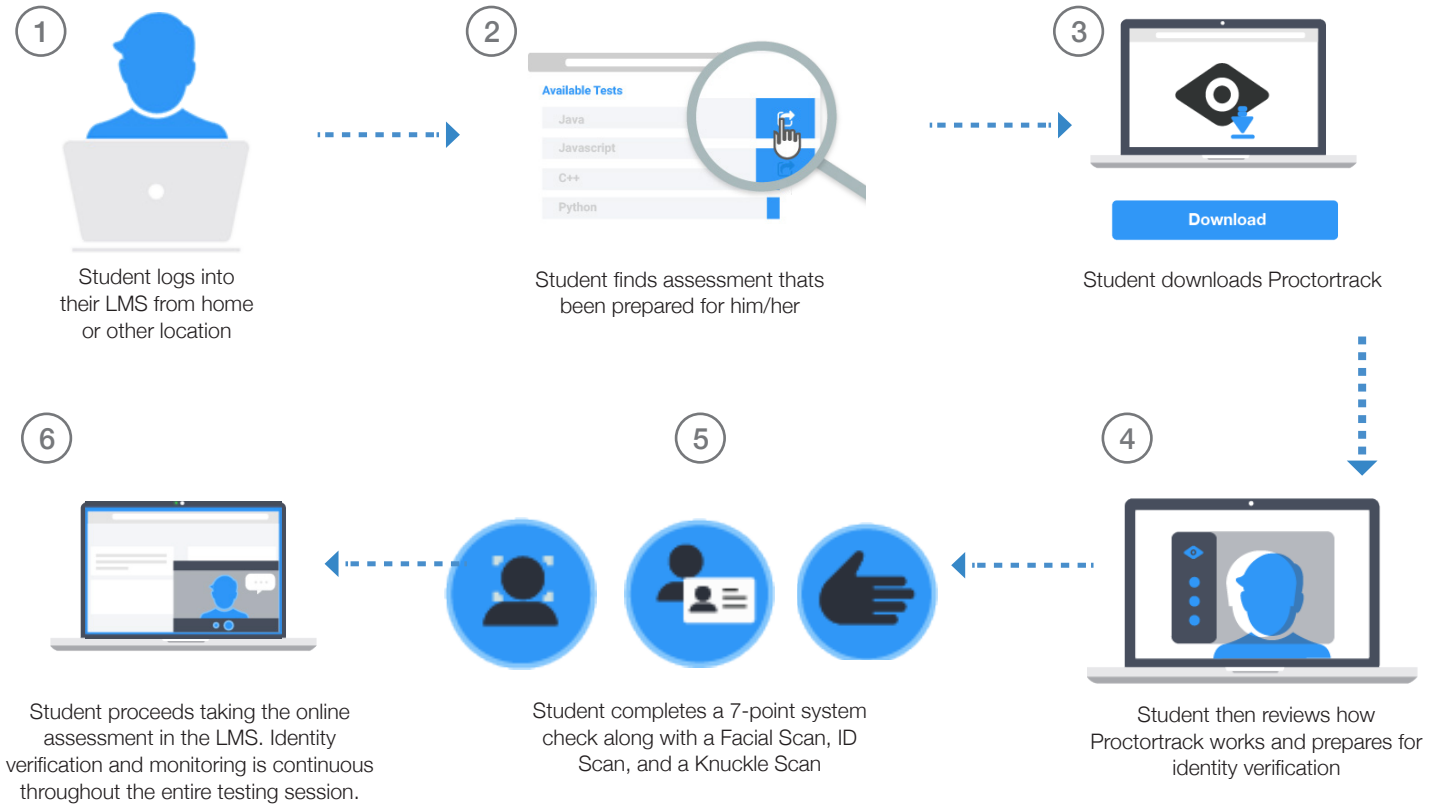

Proctortrack is the most cost effective solution in the market and delivers the most value as a online proctoring partner.

Contact Verificient Technologies to learn more about how Proctortrack can elevate your online programs.

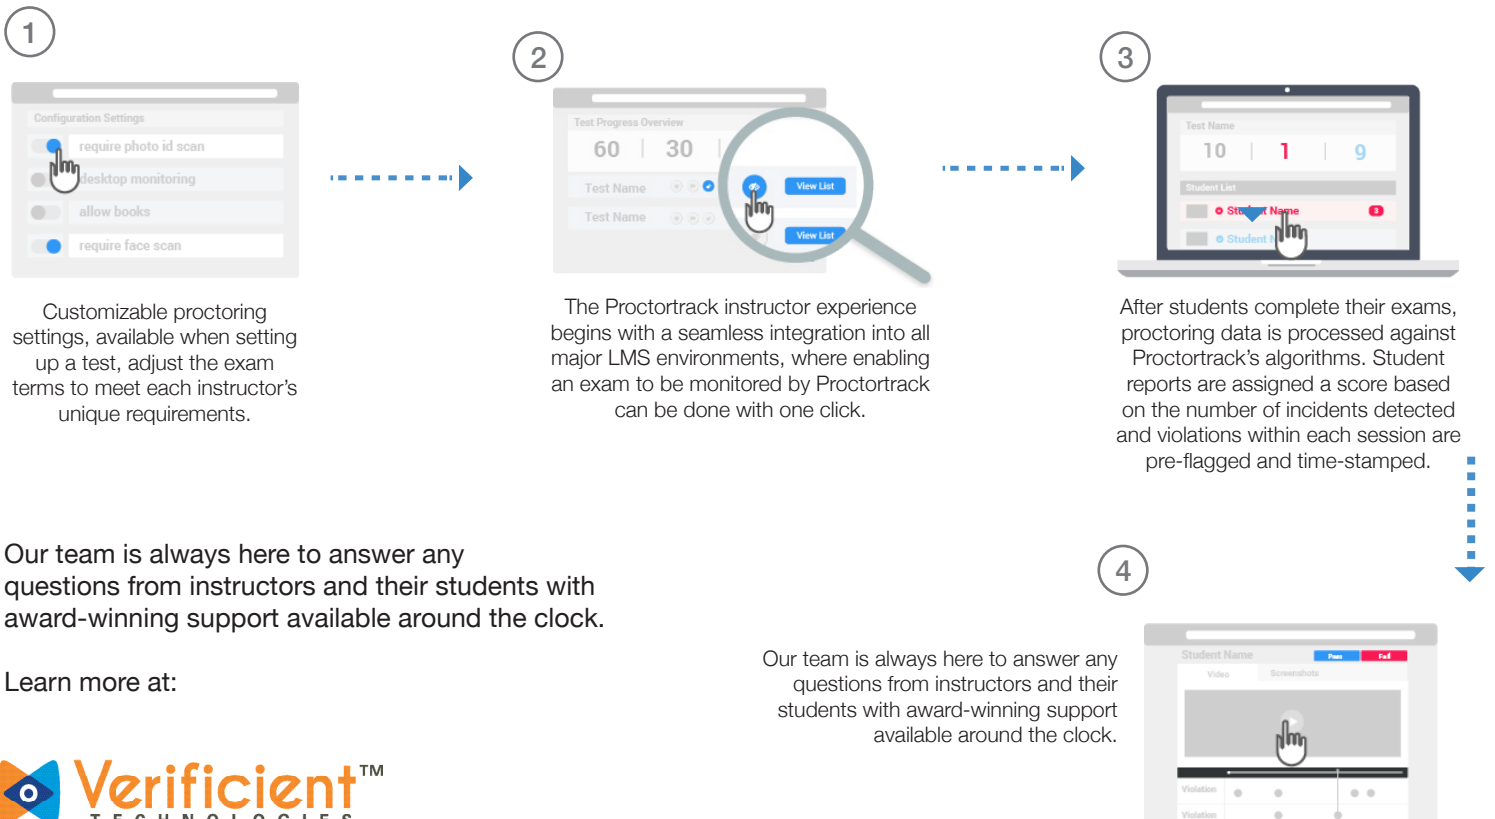

\* US Patent No. 8,926,335, "System and Method for Remote Test Administration and Monitoring"

Features Set	Proctortrack	Online Human Proctoring
Sensible, flexible pricing	✓	
Uses standard built-in hardware	✓	✓
No scheduling required	✓	
Attendance Verification	✓	
Automated approach	✓	
Browser Lock	✓
