Blockchain Services for Enterprises

Enterprise Blockchain Enabling Services

Enterprise Blockchain 101 for Business Leaders Half Day Seminar covering

- Blockchain Fundamentals and Applications
- Insights to current projects
- How to get benefits from DLT Apps
- Data Security and Privacy in a Hyperledger world
- Enabling Environment and Investments

Enterprise Blockchain – Architectural Insights Workshop for Technical Leaders

- Blockchain Architecture for Enterprise
- Expertise, Resources and Challenges
- Integration with Existing Systems
- Development Life Cycle and key learnings
- Building Blocks – Practical Demo with Hyperledger

Enterprise Blockchain DevGuru Hands on training for Architects and development community.

- Sandbox Environment for training.
- Learn to build Hyperledger Applications

CONSULTING

Business case evaluation workshop and support

- Use Case Validation and Blockchain Applicability check list.
- Effort evaluation, Alternatives, Benefits Analysis

Blockchain architecture and integration

- Network Design and Architecture Applicable for your use case

Development enablement and Oversight

- Enabling Services for your development team – Best practices, Spot consulting

Blockchain project consulting

- Contract Consultant Shared Services

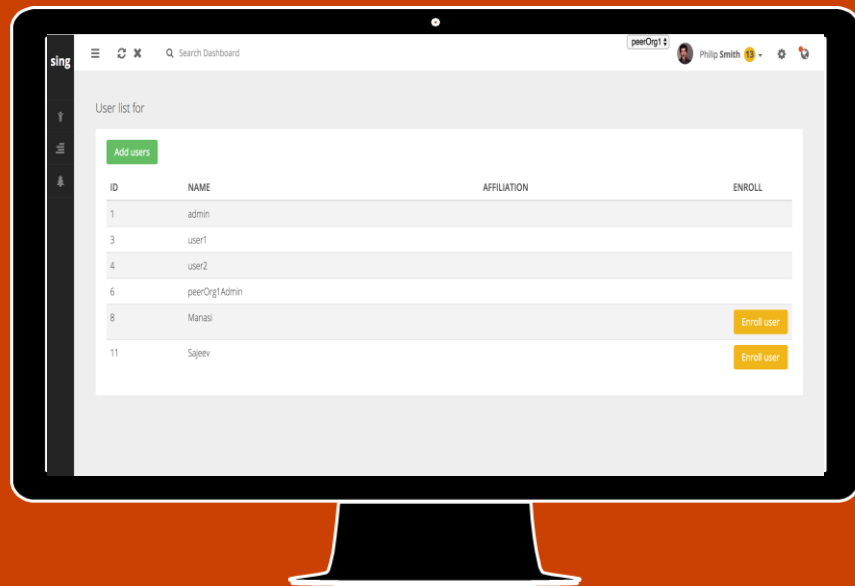

Our Accelerator CDPaaS Hyperledger Deployment Templates & Management Console

ChainDigit proprietary Platform as a service for
Hyperledger networks

Key features include :

- Organization management
- User management
- Hyperledger channel management
- Chaincode management
- Blockchain explorer
- Cloud agnostic templates

Product Development Services & Incubation Lab

Use Case Workshops & Advisory

- Feasibility Analysis, Product Evaluation and Program Advisory services on Blockchain Applications

Product/ Prototype development

- Design, Development and implementation services for identified projects

Integration services

- Integrating Distributed Ledger Applications with core enterprise applications (REST)

Provisioning of Blockchain Infra on cloud

- Architect and Implement Hyperledger Network on Private or Public Cloud. Dev & Prod Environments

ChainDigit propriety development accelerators

WHY CHAINDIGIT

Technology Experience

ChainDigit team members come with very strong technology background with Enterprise clients and have gained experience by leading projects in core applications in Financial, Retail and Manufacturing sectors.

You can count on their years of experience and in-depth knowledge of Hyperledger Fabric in your blockchain projects for guaranteed success.

Integration Expertise

ChainDigit consultants bring a strong understanding of your existing applications like SAP and Oracle ERPs, which makes them unique and valuable as you try to integrate your new Distributed ledger applications with your existing core systems.

Our team continuously invests in connectors and API services which boosts the capability of existing systems to make sure your blockchain use cases fit within your overall strategy

Tools and Accelerators

ChainDigit Research and Development team understands the need for Accelerators and tools to easily deploy the Fabric network so that you can focus your valuable time in developing and deploying your use cases without spending this on figuring out the different complexities of underlying blockchain Infrastructure.

Our accelerators help you set up your peer network and channel configurations and deploy chaincode in minutes and not weeks
