Corporate Overview

The Company

Bassam Infotech is founded on 20+ years of ERP implementation, customization, and training experience to serve small to medium size businesses in India, Dubai, Saudi Arabia, Europe, and Africa. The professionals at Bassam Infotech have ERP implementation experience in manufacturing, job contracting, project costing, finance, sales, purchasing, HR management systems, retail, warehouse management, logistics, and more. Upon a successful ERP implementation, the company believes training is a necessity so that organizations can own their business processes. Bassam Infotech takes special care in a customized approach for continued project support.

MISSION

The Bassam Infotech mission is to offer the best possible Business solutions for small and medium and large business segments in the region, with positive outcomes that align with business objectives for every enterprise.

VISION

Let us Endeavour to make Bassam Infotech a trusted business solution provider worldwide.

Goal

Our goal is to solve operational challenges, Simplify workflow, Sell more product and services, Increase revenue and Grow businesses

OFFICE

The Bassam Infotech's beautiful office, based in India, is employee friendly and designed with an environmentally friendly, green-conscious concept.

Major lines of business

The company offers a broad portfolio of services, technologies and third-party alliances to deliver the benefits of information management to its customers. These activities include systems integration, ERP implementation, software consultancy, development of software products, distribution of international software and hardware products, collaboration in advanced technologies and education services.

Bassam Infotech LLP has been divided into different business divisions for ease of operations and management. These business divisions although operating independently often come together to provide joint solutions to our clients. The divisions are Systems Integration Division, Software Consultancy and Project Management Division and Education Services Division.

Systems Integration Division

The leading Systems Integrators in India, our Systems Integration services embrace the understanding and execution of complete projects, using the whole gamut of IT services and solutions which includes ERP, Software, Hardware, Networking and related services such as Installation, Training, and Support, either on a turnkey basis, or as individual assignments. The Systems Integration Division of Bassam Infotech LLP is the premier operating division of the company. Another key activity is the Development and Marketing of products, both by

Bassam Infotech LLP and through strategic partnerships with global IT market leaders.

Bassam Infotech LLP combines various Technologies, Business Processes and Domain knowledge to deliver complete solutions to its customers across identified industry segments as depicted below:

The company's consulting strength has been the capability to provide an umbrella of IT services to its customers, based on the philosophy that the client knows his business best. Therefore, clients spanning a wide range of vertical markets, choose Bassam Infotech LLP for four primary reasons:

The ability to obtain a wide range of IT services from a single source

Track record in executing fixed price turnkey projects

Willingness to take up responsibility for the Total Solution

Dedicated Center Of Excellence for varied technologies such as ODOO, Tally, Pentaho, Oracle and so on.

Education Services Division

Bassam Infotech LLP Education Services Division provides multi-level learning solutions across the entire spectrum of the enterprise through a customer driven approach.

For learning solutions, organizations need partners and not vendors. Bassam Infotech LLP provides complete end-to-end solutions and effective implementation as your learning solutions partner. Bassam Infotech LLP solutions are a unique combination of learning and business process development tools to provide skill gap identification,

creation of customized solutions and implementation within a pre-decided time frame. This makes the whole process cost effective and ensures maximum returns on the training investments.

Continuously improving Quality Management Processes

Quality consciousness ranks the highest at Bassam Infotech LLP. This is evident at every level, as well as numerous excellences in various LEVELS. Bassam Infotech LLP practices for total quality management.

Alliances

Bassam Infotech LLP strongly believes in building strategic and tactical alliances with services providers and product vendors in order to augment our ability to deliver world-class solutions to our client. Bassam Infotech LLP carefully selects its alliance partner based upon their ability to deliver high quality resources with the goal of enhancing our ability to provide end-to-end solutions. In addition, these alliances allow us provide specialized expertise that we may not have in-house or that is difficult to obtain in the marketplace.

In developing these alliances, however, we are careful not to compromise our objectivity and independence. We believe that because of our global presence and relationships with other services and product providers we are able to bring a wider variety of expertise and solutions to our clients.

Products & Services

ODOO Manufacturing:

ODOO Manufacturing Software is designed to fit for both Discrete and Process Manufacturing Process. Its unique features help the clients to run their manufacturing process smoothly and without any hassles. Screens are designed in such a way that only minimal data entry is required. The software gives a clear insight on process, consumption, cost and manpower utilization. In-depth analysis can be made using the reporting tool which will help clients check for further room for production optimization.

ODOO Sales & Distribution

ODOO Sales & Distribution Software will ease the operations of all kinds of Sales transactions. The system allows generating the quotations raised in CRM to convert into Sales Order and to Delivery Order and to Sales Invoice in single screen itself without additional data entry and by keeping all access rights and security intact. The module is loaded with such features which will help the clients to do more transactions in less time. The entire module is configured through setups which will help each client for follow their workflow.

ODOO Retail

Retail invoicing was never easier before. Using ODOO retail the bills generation is smoother by just touching the screen with your finger tips. Whether it is bill splitting, payment handling, discount applying or bill printing all can be done in minimal steps.

ODOO Purchasing & Inventory

Getting quotations from vendors, sending PO to vendors, receiving goods in warehouse, doing stock transfers, conducting physical inventory, paying to your vendor, sending back goods to your

vendor, and so on. Seamlessly you can do all the activities without the fear of mistake and with less time. Now purchasing goods or inventory management is not at all a time taking process using ODOO Purchasing and Inventory Modules.

ODOO Accounting and General Ledger

Whether it is critical financial reporting or entering journals or handling petty cash or defining and controlling budgets or bank reconciliation or managing assets or finance analysis report generation or raising debit note/credit note, leave all the worries to ODOO Accounting and General Ledger.

ODOO Human Resources & Payroll

Managing your employee is a critical task in any organizations. Thanks to ODOO Human Resources and Payroll module for taking care of your employees. Employee Profile, Leave Management, Attendance Management, Performance Management, Expense to employee, Training to employees, Recruiting, Employee Payroll, deductions, earnings, whatever you say on Employee Management, it is there in ODOO Human Resources & Payroll.

ODOO Job Contracting / Project Costing

Precise estimation and accurate costing on Projects. If you can make sure these things then your project is success. What you need to do is only rely on ODOO Job Contracting / Project Costing module, rest all is through.

ODOO Logistics and Material Management
